Foundation 1981

Employees 70

Production 2.200 sqm

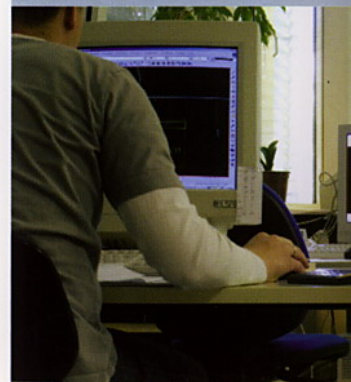

Years of experience and a wealth of knowledge of agitator and process engineering has put us in a leading position in the manufacture and delivery of agitators and stirrers.

A permanent, intensive and highly ambitious concept enables us to provide a range of products that are state-of-the-art in agitator design and construction.

Our range of products has been specially tailored to meet the specific needs of our customers. It is constantly further developed and reflects the latest technological advances in agitator design and engineering.

Quality first!

This is the philosophy we pursue. Certification to DIN EN ISO 9001/2000 and the use of materials and purchased parts of the highest quality ensure that only products of renowned national and international manufacturers are used in the manufacturing process at PRG.

Development and production -
at PRG a logical process

The complex applications of our discerning customers make effective planning and project management essential.

Efficient production requires close co-operation with our customers – from the first discussion to subsequent service. Highly experienced project managers assure the guaranteed performance of our products in order to maintain our high quality standards.

Our expertise ensures that our customers are provided only with products of the highest quality.

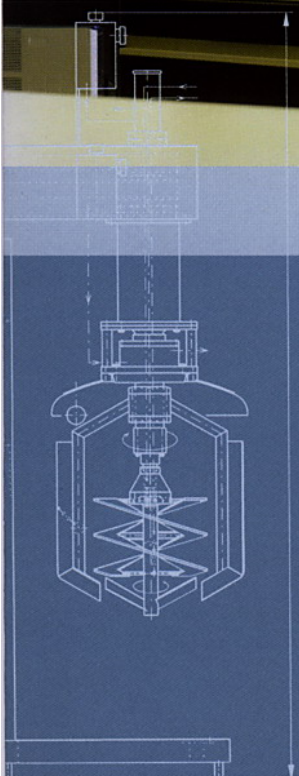

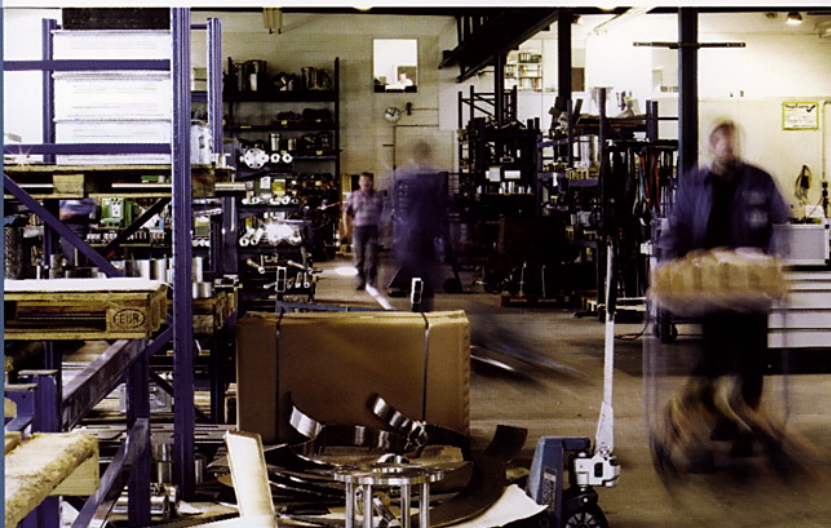

Manpower

All PRG employees know that satisfaction of our customers comes first.

They give their best every day to prove that they are partners on whom you can rely on.

Continuous further training and motivating working conditions place this commitment on a solid foundation.

You can be assured that the PRG employees speak your language.

Industries

We have grown and developed with the requirements of our customers. Our endeavours to constantly provide "state-of-the-art" technology that satisfies the highest quality requirements, have strengthened the trust of our customers in PRG. Constant optimisations and modifications of diverse process technologies enable us to adequately respond to increasingly stringent statutory requirements. This has made PRG a strong partner to industries worldwide, including the following in particular:

- Chemical industry
- Pharmaceutical industry
- Paint, lacquer and varnish industry
- Food industry
- Cosmetics industry

Take advantage of our expertise!

Products

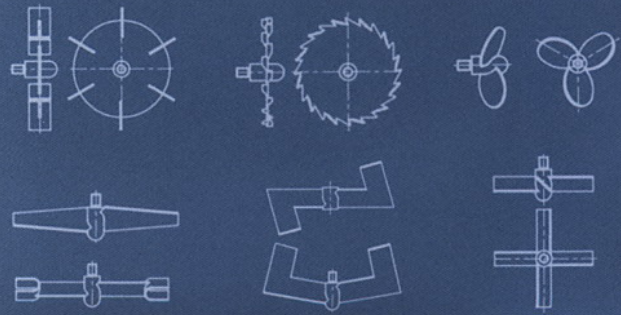

Agitation is one of the most important basic operations in applied process engineering. Our extensive range of products contains simple propeller agitators as well as geared agitators and special design solutions tailored to your requirements.

Our range of products:

- High-speed agitators
- Geared agitators
- Coaxial agitators/
double-motion agitators
- Homogenisers
- Magnetic stirrers
- Special design solutions
- Tripods
- Accessories

PRG offers a reliable partnership and products of the highest quality standard.

You can rely on it!
