

## Products

**PRG**

Präzisions-Rührer GmbH  
Agitators Stirrers

Engineering at its best.

### Magnetic Stirrer

Installed from the side in silo-tanks, especially for aseptic processes.

---

### Conus Dryer

With helical mixing blades, especially for powder drying.

---

### Propeller Agitator

Standard agitator for simple mixing tasks with low viscous media.

### 3-Shaft-Mixer

Disperse, mix, heat transfer in one mixer for high viscous media.

---

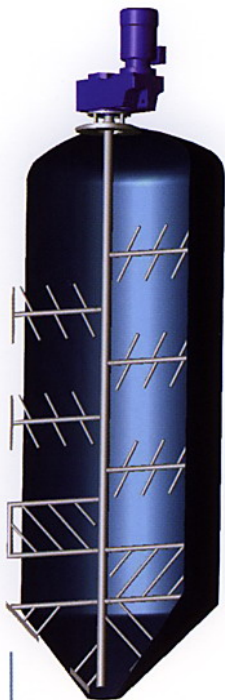

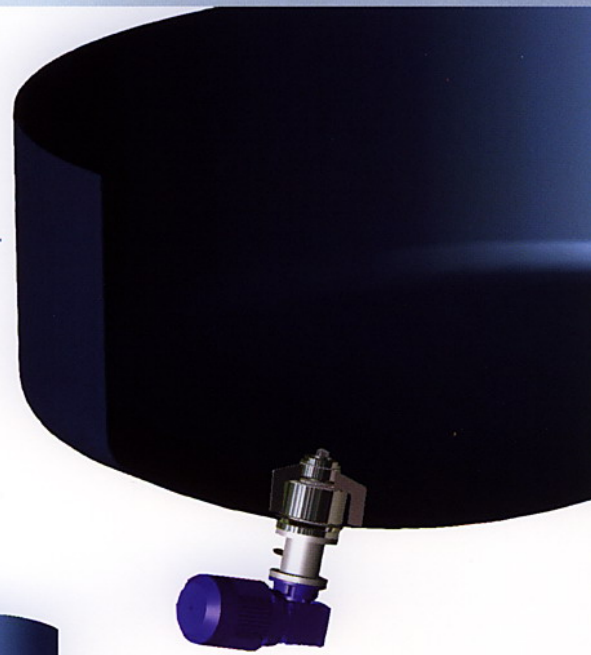

### Anchor Agitator

With scrapers for optimum heat transfer in high viscous media, shown with baffles from above.

### Magnetic Stirrer

Standard mag-mixer installed in bottom of tank für aseptic tanks up to approx. 60.000 ltr.

---

### Finger Blender

Special design for dough in industrial bakeries.

### Fermenter

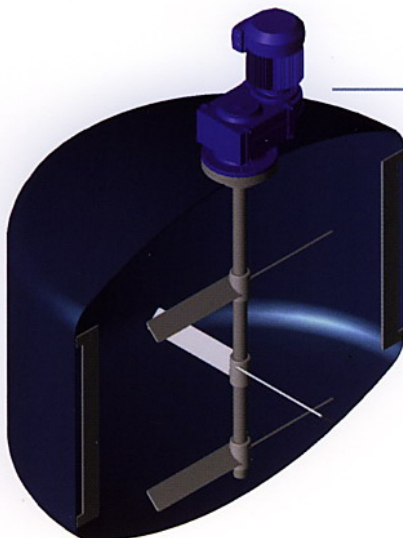

Classical Fermenter agitator with 3 Rushton turbines.

---

### Cross Blade Agitator

Installation centrally with baffles.

---

### Ecomix

Multi purpose mixing blade with high turbulence by additional counter flow blades.

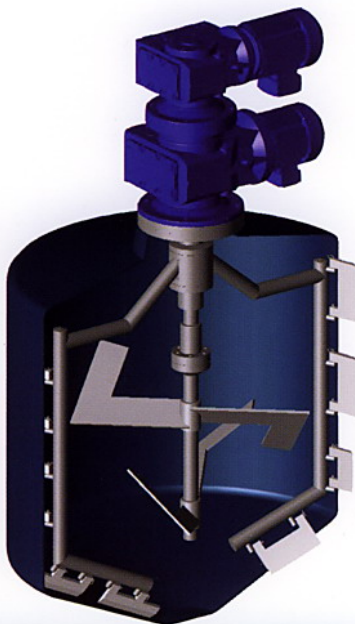

### Multitalent

The combination of different mixer shapes allows to perform different mixing tasks in one vessel.

### U/Z-Elements

The around type of mixer for multi purpose mixing of middle to high viscous media, especially in the food industry.

### Universal-Agitator

This contra-rotating mixer is able to carry the various types of mixer blades and can be attuned to the process in an optimized way and it can handle the most difficult mixing tasks.

© Dana Henze 06

### Industries

- Chemical industry
- Pharmaceutical industry
- Paint, lacquer and varnish industry
- Food industry
- Cosmetics industry

### Products

- High-speed agitators
- Geared agitators
- Coaxial agitators/ double-motion agitators
- Homogenisers
- Magnetic stirrers
- Special design solutions
- Tripods
- Accessories
